Dear George:

Last weekend we hosted our first party after the completion of our kitchen remodel. Although we didn't add much square footage to the kitchen, the new design and updates made a world of difference. Four different people were cooking here at the same time and with the enlarged island and extra cabinets, we were able to work together without any problems. They all remarked on the subtle changes in layout you made and how much more functional the kitchen is now.

We are extremely happy with the new kitchen. The quality of the Honey Brook cabinets is excellent. The fit and finish is amazing. With some very minor adjustments, everything fit perfectly. The porcelain tile floor was laid on a diagonal and really enhancing the look of the kitchen. The granite also looks great. There was a minor chip near the stove and the crew repaired it so that you could never tell it was there.

Chris and his crew were a pleasure to work with, as were the guys from Brady Electric. They were meticulous in their work and made adjustments until everything was just right. They were very accommodating with any requests we had for changes. They were also extremely patient with us.

Without reservation we would recommend Cameo to anybody who wants to remodel their kitchen. We are very definitely satisfied customers.

Sincerely,

Carol Peddicord
