---

It's been one year since Cameo Kitchens gave me my dream kitchen and I couldn't be happier. Your people were courteous, professional, on time, and always willing answer any question I had. From demolition to completion it only took an amazing three weeks. (The longest part was waiting for my scheduled install date to arrive.) Seeing the snow outside reminded me that the weather didn't even stop your crews. When I hear the horror stories of others having their kitchens remodeled by someone else, I politely nod and think to myself they should have listened to me and chosen Cameo Kitchens.

Thinking back on the entire process, would I have done anything differently? There are only two things I would have done differently. I should have asked for a second spice rack door and I should have said I wanted a new sliding glass door. After looking at my beautiful new kitchen for a few months I had to go get a new sliding glass door to complement the beautiful creation you gave me.

Mike took my wishes and created a beautiful, functional kitchen. I never could have dreamt of the changes he presented, but looking at the design now it's as though it was meant to be that way. Although I did give him a list of things I wanted, Mike provided me with other options that were really better than I could imagine.

If I ever move I will definitely come back and have you design me a new kitchen.

Thanks again for the kitchen of my dreams.

Kathi Weinheimer
